Subject Index of Volume 215

Alloys
  nanoscopic structures of Fe–B–Si metallic glasses, 162
Aluminium
  interfacial reactions in single-crystal-TiN(100)/Al/Polycrystalline-TiN multilayer thin films, 152
  reactive diffusion in a prototype system: nickel–aluminum. II: the ordered Cu_3Au rule and the sequence of phase formation, nucleation, 26
  tensile behaviour of phosphate-coated aluminium, 52
  thickness measurements of thin films: comparison of techniques using characteristic X-ray line ratio techniques, 108
Aluminium oxide
  effect of phase thickness on the elimination of model errors in non-absorbing or slightly absorbing homogeneous thin films, 203
Amorphous materials
  nanoscopic structures of Fe–B–Si metallic glasses, 162
Anisotropy
  high index plane selectivity of silicon anisotropic etching in aqueous potassium hydroxide and cesium hydroxide, 58
Atomic force microscopy
  molecular resolution images of enzyme-containing Langmuir–Blodgett films, 88
Auger electron spectroscopy
  new epitaxial orientation of $CoSi_2$ on (111)Si, 184
  Auger electron spectroscopy study of annealed gold contacts to InP, 42

Biomaterials
  molecular resolution images of enzyme-containing Langmuir–Blodgett films, 88
Borides
  diffusion in the B–a–Fe system and compound formation between electron gun deposited boron thin films and steel substrate, 35
Boron
  diffusion in the B–a–Fe system and compound formation between electron gun deposited boron thin films and steel substrate, 35
  nanoscopic structures of Fe–B–Si metallic glasses, 162

Carbon
  carbon growth by thermal laser-assisted chemical vapour deposition, 126
Catalysis
  ZnSe growth by laser-enhanced metal–organic chemical vapour deposition, 142
Chemical vapour deposition
  carbon growth by thermal laser-assisted chemical vapour deposition, 126
  internal stress analysis in diamond films formed by d.c. plasma chemical vapour deposition, 174
  correlations between properties of plasma-enhanced chemically vapour deposited silicon nitride and the deposition conditions, 134
Cobalt
  film thickness effect on the epitaxial growth of $CoSi_2$ on Si(111), 71
Computer simulation
  modelling of silicon molecular beam epitaxy on Si(100), 14
Conductivity
  conduction mechanism in indium tin oxide/electroinactive polypyrrole/indium tin oxide sandwich structures, 200
  electrical conductivity of vacuum-deposited vanadium pentoxide thin films, 196
Contacts
  Auger electron spectroscopy study of annealed gold contacts to InP, 42
  diffusion effects at Pt–GaAs interfaces, 50

Deposition process
  electrokinetic study of Langmuir–Blodgett film coated surfaces, 223
  influence of the deposition parameters on the composition, structure and X-ray photoelectron spectroscopy spectra of Ti–N films, 1
  structure of TiN films deposited on heated and negatively biased silicon substrates, 8
Diamond
  internal stress analysis in diamond films formed by d.c. plasma chemical vapour deposition, 174
Dielectric properties
  electrical conductivity of vacuum-deposited vanadium pentoxide thin films, 196
  electron energy loss investigations on lead phythalocyanine, 229
Diffusion
  diffusion effects at Pt–GaAs interfaces, 50
  diffusion in the B–a–Fe system and compound formation between electron gun deposited boron thin films and steel substrate, 35
  reactive diffusion in a prototype system: nickel–aluminum. II: the ordered Cu_3Au rule and the sequence of phase formation, nucleation, 26

Electrical properties
  low temperature mobility in $Si–Si_{1-x}Ge_x$ quantum wells, 115
Electron energy loss spectroscopy
  electron energy loss investigations on lead phythalocyanine, 229
Electronic devices
  conduction mechanism in indium tin oxide/electroinactive polypyrrole/indium tin oxide sandwich structures, 200
Ellipsometry
  effect of phase thickness on the elimination of model errors in non-absorbing or slightly absorbing homogeneous thin films, 203
Emission
  thickness measurements of thin films: comparison of techniques using characteristic X-ray line ratio techniques, 108
Epitaxy
  film thickness effect on the epitaxial growth of $CoSi_2$ on Si(111), 71
  growth kinetics of iron silicides fabricated by solid phase epitaxy or ion beam synthesis, 76
Etching
  high index plane selectivity of silicon anisotropic etching in aqueous potassium hydroxide and cesium hydroxide, 58
Evaporation
  thin binary $In_{1-x}Sb_x$ films prepared by flash evaporation, 188

Faceting
high index plane selectivity of silicon anisotropic etching in aqueous potassium hydroxide and cesium hydroxide, 58

Gallium antimonide
diffusion effects at Pt–GaAs interfaces, 50
Gallium arsenide
effect of external excitation on the sulphur passivation of GaAs surfaces, 179
Germanium
low temperature mobility in Si–$Si_{1-x}Ge_x$ quantum wells, 115
Gold
Auger electron spectroscopy study of annealed gold contacts to InP, 42
Grain boundary
internal stress analysis in diamond films formed by d.c. plasma chemical vapour deposition, 174
structural, optical and electrical properties of spray pyrolytically deposited films of copper indium diselenide, 65
Graphite
carbon growth by thermal laser-assisted chemical vapour deposition, 126
Growth mechanism
growth kinetics of iron silicides fabricated by solid phase epitaxy or ion beam synthesis, 76
molecular orientation of alkyl-aromatic polyamide thin films prepared by vapour deposition polymerization, 94
reactive diffusion in a prototype system: nickel–aluminum. II: the ordered Cu_3Au rule and the sequence of phase formation, nucleation, 26

Hydrocarbons
carbon growth by thermal laser-assisted chemical vapour deposition, 126

Impurities
structure of TiN films deposited on heated and negatively biased silicon substrates, 8
Indium antimonide
thin binary $In_{1-x}Sb_x$ films prepared by flash evaporation, 188
Indium phosphide
Auger electron spectroscopy study of annealed gold contacts to InP, 42
Insulators
conduction mechanism in indium tin oxide/electroinactive polypyrrole/indium tin oxide sandwich structures, 200
Interface
diffusion effects at Pt–GaAs interfaces, 50
Iron
growth kinetics of iron silicides fabricated by solid phase epitaxy or ion beam synthesis, 76
nanoscopic structures of Fe–B–Si metallic glasses, 162

Langmuir–Blodgett films
electrokinetic study of Langmuir–Blodgett film coated surfaces, 223
molecular resolution images of enzyme-containing Langmuir–Blodgett films, 88
preparation and waveguide properties of polyglutamate Langmuir–Blodgett films, 98
vibrational spectra of porphyrin aggregates in Langmuir monolayers observed with a Raman microscope, 218

Laser irradiation
thermal diffusivity measurements by photothermal laser beam deflection (PTD): data analysis using the Levenberg–Marquardt algorithm, 103
Luminescence
effect of external excitation on the sulphur passivation of GaAs surfaces, 179

Molecular beam epitaxy
modelling of silicon molecular beam epitaxy on Si(100), 14
Multilayers
preparation and waveguide properties of polyglutamate Langmuir–Blodgett films, 98

Nickel
reactive diffusion in a prototype system: nickel–aluminum. II: the ordered Cu_3Au rule and the sequence of phase formation, nucleation, 26

Optical coatings
effect of phase thickness on the elimination of model errors in non-absorbing or slightly absorbing homogeneous thin films, 203
Optical properties
preparation and waveguide properties of polyglutamate Langmuir–Blodgett films, 98
structural, optical and electrical properties of spray pyrolytically deposited films of copper indium diselenide, 65
effect of phase thickness on the elimination of model errors in non-absorbing or slightly absorbing homogeneous thin films, 203
thin binary $In_{1-x}Sb_x$ films prepared by flash evaporation, 188
Organic substances
electron energy loss investigations on lead phythalocyanine, 229
rectifying and photovoltaic effects of organic double-layer film diode based on lightly doped poly-(3-methylthiophene)/5-methyl-10-(3,5-dinitrobenzyl)-5,10-dihydrophenazine junction, 123
growth of organic thin films on silicon substrates studied by X-ray reflectometry, 213
Organometallic vapour deposition
ZnSe growth by laser-enhanced metal–organic chemical vapour deposition, 142

Phase transitions
reactive diffusion in a prototype system: nickel–aluminum. II: the ordered Cu_3Au rule and the sequence of phase formation, nucleation, 26
thin binary $In_{1-x}Sb_x$ films prepared by flash evaporation, 188
Phosphorus
tensile behaviour of phosphate-coated aluminium, 52
Photovoltage
rectifying and photovoltaic effects of organic double-layer film diode based on lightly doped poly-(3-methylthiophene)/5-methyl-10-(3,5-dinitrobenzyl)-5,10-dihydrophenazine junction, 123
Physical vapour deposition
development and properties of single-crystal silver selenide layers, 147
molecular orientation of alkyl-aromatic polyamide thin films prepared by vapour deposition polymerization, 94
structure of TiN films deposited on heated and negatively biased silicon substrates, 8

Plasmons
electron energy loss investigations on lead phythalocyanine, 229
Platinum
diffusion effects at Pt–GaAs interfaces, 50
Polymers
conduction mechanism in indium tin oxide/electroinactive polypyrrole/indium tin oxide sandwich structures, 200
molecular orientation of alkyl-aromatic polyamide thin films prepared by vapour deposition polymerization, 94
preparation and waveguide properties of polyglutamate Langmuir–Blodgett, films, 98
Pyrolysis
structural, optical and electrical properties of spray pyrolytically deposited films of copper indium diselenide, 65

Quantum effects
low temperature mobility in $Si–Si_{1-x}Ge_x$ quantum wells, 115

Raman scattering
internal stress analysis in diamond films formed by d.c. plasma chemical vapour deposition, 174
vibrational spectra of porphyrin aggregates in Langmuir monolayers observed with a Raman microscope, 218
Reaction kinetics
interfacial reactions in single-crystal-TiN(100)/Al/Polycrystalline-TiN multilayer thin films, 152

Selenides
development and properties of single-crystal silver selenide layers, 147
ZnSe growth by laser-enhanced metal–organic chemical vapour deposition, 142
Silicides
new epitaxial orientation of $CoSi_2$ on (111)Si, 184
film thickness effect on the epitaxial growth of $CoSi_2$ on Si(111), 71
growth kinetics of iron silicides fabricated by solid phase epitaxy or ion beam synthesis, 76
Silicon
high index plane selectivity of silicon anisotropic etching in aqueous potassium hydroxide and cesium hydroxide, 58
modelling of silicon molecular beam epitaxy on Si(100), 14
growth of organic thin films on silicon substrates studied by X-ray reflectometry, 213
Silicon nitride
correlations between properties of plasma-enhanced chemically vapour deposited silicon nitride and the depositon conditions, 134
Sodium
low temperature mobility in $Si–Si_{1-x}Ge_x$ quantum wells, 115
Steel
diffusion in the B–a–Fe system and compound formation between electron gun deposited boron thin films and steel substrate, 35
Stress
tensile behaviour of phosphate-coated aluminium, 52
Structural properties
development and properties of single-crystal silver selenide layers, 147
film thickness effect on the epitaxial growth of $CoSi_2$ on Si(111), 71
influence of the deposition parameters on the composition, structure and X-ray photoelectron spectroscopy spectra of Ti–N films, 1
Superlattices
low temperature mobility in $Si–Si_{1-x}Ge_x$ quantum wells, 115
Surface stress
effect of external excitation on the sulphur passivation of GaAs surfaces, 179
Surface structure
effect of external excitation on the sulphur passivation of GaAs surfaces, 179

Thermal properties
thermal diffusivity measurements by photothermal laser beam deflection (PTD): data analysis using the Levenberg–Marquardt algorithm, 103
Titanium
wear characteristics of TiO_2 coating and silicon carbide alloyed layer on Ti–6Al–4V material, 166
Titanium nitride
influence of the deposition parameters on the composition, structure and X-ray photoelectron spectroscopy spectra of Ti–N films, 1
interfacial reactions in single-crystal-TiN(100)/Al/Polycrystalline-TiN multilayer thin films, 152
structure of TiN films deposited on heated and negatively biased silicon substrates, 8
Titanium oxide
wear characteristics of TiO_2 coating and silicon carbide alloyed layer on Ti–6Al–4V material, 166
Transmission electron microscopy
new epitaxial orientation of $CoSi_2$ on (111)Si, 184
development and properties of single-crystal silver selenide layers, 147
interfacial reactions in single-crystal-TiN(100)/Al/Polycrystalline-TiN multilayer thin films, 152
Tribology
wear characteristics of TiO_2 coating and silicon carbide alloyed layer on Ti–6Al–4V material, 166

Vanadium oxide
electrical conductivity of vacuum-deposited vanadium pentoxide thin films, 196

X-ray diffraction
thickness measurements of thin films: comparison of techniques using characteristic X-ray line ratio techniques, 108
molecular orientation of alkyl-aromatic polyamide thin films prepared by vapour deposition polymerization, 94
X-ray photoelectron spectroscopy
influence of the deposition parameters on the composition, structure and X-ray photoelectron spectroscopy spectra of Ti–N films, 1
effect of external excitation on the sulphur passivation of GaAs surfaces, 179
growth of organic thin films on silicon substrates studied by X-ray reflectometry, 213

Zinc
ZnSe growth by laser-enhanced metal–organic chemical vapour deposition, 142
